Re: 2-Methyl-3(2H)-isothiazolone (MIT) 90 Day Response  
GDCI-107104-1479  
LANXESS Corporation

Dear Reevaluation Team Leader, PM 36:

LANXESS Corporation (LANXESS) hereby submits the following for the 90- Day Response in support of the continued registration of the active ingredient 2-Methyl-3(2H)-isothiazolone (MIT).

LANXESS Corporation is a member of the AEATF II Task Force which is currently generating exposure data for antimicrobial pesticides. These studies are on-going. US EPA has been fully engaged in this project from the outset, and there is Agency agreement that data from these studies may be cited by member companies. The following data requirement will be met by AEATF II data:

- 875.1100 Dermal Exposure - Outdoor
- 875.1200 Dermal Exposure – Indoor
- 875.1300 Inhalation Exposure – Outdoor
- 875.1400 Inhalation Exposure – Indoor
- 873.2300 Indoor Surface Residue Dissipation
- SS-1221 Textile Leaching

LANXESS Corporation is a member of the American Chemistry Council Biocide Panel Isothiazolinones (IT) Task Force. The IT Task Force will provide the following data in support of CMIT:

- 875.1700 Product Use Information
- 875.2500 Inhalation exposure (Chamber)

This DCI response package includes:

- Data Call-In Response (completed in CDX)
- Completed Requirements and Registrant's Response (completed in CDX)
- IT Task Force letter including AEATF II letter describing AEATF studies and membership (8 pages – attached in CDX submission).
- Waiver for 850.3020, Honey Bee Acute Contact Toxicity (1 page – attached in CDX submissions)

Please call me at 412-809-4773 if you have any questions or require additional information.

Sincerely,

Luanne Jeram  
Head, Regulatory Affairs MPP NA
